

Lakeside

November 2, 2021

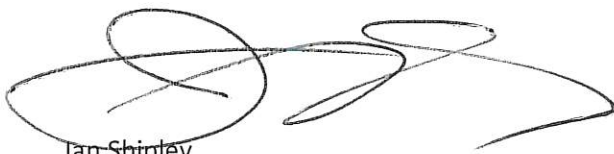

Like everyone today Lakeside is responding to global changes to supply and demand and the challenges that can come with that. Utilizing the Core Values and Core Purpose of Lakeside we have decided to make some changes to the prepackaged feed and farm supply part of our business.

Effective Jan 1, 2022, we will no longer be carrying prepackaged feed, pet food and bird feed. We will also discontinue the sale of farm supply products like salt, wood shavings, baler twines and animal health products.

We will continue to sell packed fertilizer and grass seed as these are part of our core business of fertilizer, seed and crop protection products.

I would like to thank you for your past business support and wish you success in your future agricultural business ventures.

Regards
